

I would like to ask that you please do not pass this proposal as it currently stands. The powers granted to the federal government and the FBI by the USAPATRIOT act are already staggeringly draconian and are a clear and ready threat to the freedom that this country stands for. Everyone I talk to is concerned about the decrease of privacy and rights in this country and many of us see this decline as approaching tyranny of a fascist nature. Please do not contribute to this growing and already dangerous problem by granting further governmental "rights" to spy on it's citizens. Please remember your duty to the people of this country to safe-guard their access to communications technologies and free speech rights in the use of those technologies.

Thank you.
